- 0-7/7-14/14-30.....

The screenshot shows a software interface for warehouse analysis. On the left is a blue sidebar menu with various management options. The main area displays a '库存分析-产品' (Inventory Analysis - Product) report. At the top, there are filters for '物料' (Material), '物料描述' (Material Description), '仓库' (Warehouse), 'BU' (Business Unit), and '客户' (Customer). Below these filters is a summary table with columns for different time intervals: 0-7天, 7-14天, 14-30天, 30-60天, 60-90天, 90-120天, 120-180天, and 180天以上. A red box highlights the '120-180天' and '180天以上' options. The main table lists products with columns for '物料编号' (Material No.), '物料描述' (Material Description), '规格' (Specification), '仓库代码' (Warehouse Code), '仓库名称' (Warehouse Name), '现有库存' (Current Inventory), and '单位' (Unit). The table contains several rows of product data.

5.

This section contains a collage of four overlapping screenshots from the same software interface. Each screenshot is annotated with a yellow label: '成品' (Finished Goods), '零返' (Zero Return), '不良' (Defect), and '冻结' (Frozen). The screenshots show various data tables and reports, likely related to inventory management and quality control.

6.

The screenshot displays the VICTOR ERP system interface. The top section shows a dashboard with various data points, including a table of material status. A yellow arrow points to a '呆滞跟踪' (Stagnant Tracking) label. Red boxes highlight specific data points in both the dashboard and the table below.

物料编码	物料名称	数量	备注	单位	创建日期	创建人
WS003-01-01	91	42.000000	生产使用物品退回产品订单, 目前未产配完成	80天以上	2023-07-03 16:23:57	黄小倩
